CONTENTS

GET STARTED NOW

Canon printer or scanner by visiting ij.start.canon from your web browser. Visit the webpage from an updated browser to download and install the Canon printer drivers. You will only need the Canon printer model name and the type of your operating system to finalize the setup process. Follow these steps to set up ij.start.canon printer on any Windows or Mac device.

ONE

STEPS TO ADD IJ.START.CANON PRINTER TO YOUR DEVICE

1.1 On Windows:

1. Download and install the Canon printer driver setup from ij.start.canon.
2. Then, go to the Start menu setting and navigate the Control Panel menu.
3. Select the Printer & Device option.
4. Click Add a Printer option to continue.
5. Choose your Canon printer from the list.
6. Then, tap Add and follow prompts.
7. Finally, restart the Windows device to make changes.

1.2 On Mac:

1. Download and install the Canon printer driver setup from ij.start.canon. 2.Launch the Apple menu on the device. 3. After that, launch the System Preference menu. 4. Click the Plus icon to add a new printer or scanner. 5. Choose the Canon printer from the list. 6. Finally, restart the Mac device to save changes.

1.3 On Smartphones:

1. Install the Canon PRINT Inkjet/SELPHY app on your smartphone.
2. Then, launch the app and tap Allow to grant permissions.
3. After that, select the Register Printer tab.
4. Choose the ij.start.canon printer from the list.
5. Finally, finalize the Canon printer setup process.
